

HENDRICKSON

PR5500A Acid Preset Pressure Regulator

- Wide range of operation
1/3 to 12 GPM (20 to 720 gallons per hour).
- 10, 15, 20, 25, 30, 35 and 50 PSI preset pressures available.
- High-strength Polypropylene construction.
- Thread options available for all installations.

Applications

- Industrial
- Mining Reclamation

The PR5500A offers exceptional outlet pressure control to provide consistent performance from 20 to 720 gallons per hour. The PR5500A offers the widest operation range available. The PR5500A effectively regulates at the following pressures: 10, 15, 20, 25, 30, 35, and 50 PSI, all preset to exacting factory specifications.

The unique design of the PR5500A utilizes a minimum of moving parts in a sophisticated diaphragm design that regulates itself in reaction to the overall system back pressure. The PR5500A is constructed of high strength polypropylene and all joints are sonic welded into a tamper proof and impact resistant container. A variety of thread options are available for all installation specifications.

All Hendrickson Bros. irrigation products are produced from the highest quality materials. Quality assurance testing for overall quality, performance, and durability are ongoing at Hendrickson Bros.

Specifications

Materials:

Body	Polypropylene
Diaphragm	EPDM
Spring	316 Stainless Steel
Inlet	3/4" FIPT (standard)*
Outlet	3/4" MIPT (standard)*
Overall Length	3.46"
Outside Diameter	1.59"
Operating Pressure Range	0-120 PSI

*See price list for other inlet/outlet thread configurations.
